

DESCRIPTION

Field laundry installed in an ISO 20 'container, fully equipped to provide laundry, drying and ironing to camps or field hospitals.

The equipment and the distribution are adapted to the operational needs of the client: The operation can be electric or electric / diesel with systems of generation of hot water / steam. The technical area has decalcification systems that extend the life of the washing machines. The dosage of cleaning products is automated.

In the case of hospital laundries, high-capacity washers with a sanitary barrier are installed and an installation is carried out to ensure a flow that prevents the contact of contaminated clothes with clean.

There is the possibility of attaching a tent for the tasks of sorting clothes, folding, ironing and ironing of it.

DIMENSIONS	WEIGHT (Kg)	POWER	POWER CONSUMPTION	INSTALLATION TIME
6058 x 2438 x 2438 mm	5900 approx.	Electrical / diesel	60 - 40 Kws	12 minutes
