

JET A1 STORAGE TANK CONTAINER 20' 1C

NATO STOCK NUMBER: TO CONSULT

DESCRIPTION

JET A1 aviation fuel tank integrated in an ISO 20 '1C container structure, solves the logistics needs of supply and storage of JET A1 fuel by easy and safe handling.

Its main features are:

- 12,000 litre capacity AISI 304 stainless steel tank with baffle
- Access to tank via manhole with overpressure safety valve
- Unloaded weight: 3,670 Kg
- Separate technical zone
- Built to ADR regulations and European standards
- Static discharge subsystem (earth connection)
- Simultaneous supply to two units with flows of 100 l/min at 20 m distance
- Particle-separating micro filter
- Automatic dispensing nozzles
- Flow-meters
- Self-contained motor pump for fuel pumping
- Autonomous battery power supply with battery level indicator
- Container levelling system via mechanical levelling jacks
- Tank filling through offset fill port in the technical zone or top filling via manhole.
