

## SEMI-PERMANENT HANGAR "1000"

NATO STOCK NUMBER: TO CONSULT

**DESCRIPTION**

The semi-permanent hangar "1000" has been designed for multiple purposes. It consists of an aluminium structure, self-extinguishing polyester specially treated, with an option of sandwich panel. With a surface of 1.000 m<sup>2</sup>, it is the best choice for warehouses, vehicle garage, workshop, etc.

It allows a maximum width of 36m without any type of centre column and a configurable length according to customer needs. Door sizes are also configurable due to their modularity. It can be supplied with transport kit in containers.
