

WATER STORAGE TANK CONTAINER ISO 20' 1C

MOBILE WATER
TREATMENT

NATO STOCK NUMBER: 2510-33-215-5048

DESCRIPTION

This equipment, consisting of a water tank built into an ISO 20' 1C container structure, solves logistics requirements for the supply and preservation of potable water in optimum conditions, and is easy to handle, load and unload.

MAIN FEATURES

- Tank in AISI 304L stainless steel, 12,000 l capacity and baffle plates.
- Access to tank via manhole.
- Unloaded weight 3,400 Kg.
- Separate technical zone.
- Operating range between -20°C and 50°C.
- Supply with 60 m hose with one or two simultaneous supply points.
- Digital flow meter.
- Self-contained motor pump for pumping water.
- Autonomous battery power supply with battery level indicator.
- System for preserving the potability of water by measurement and dosing of chlorine and pH.
- Operating mode selector: loading/purification-storage.
- Container levelling system via mechanical levelling jacks.
- Tank filling through top lid or offset fill port in technical zone.
